

# Install ROS Noetic Ninjemys on Ubuntu OS 20.04 LTS

شرح الخطوات بالعربي\*

اول خطوة قم بزيارة الرابط في الأسفل واتبع الخطوات الموضحة في الصور ادناه  
<https://www.ros.org/>

The screenshot shows the ROS.org website. At the top, there's a navigation bar with links: About, Why ROS?, Getting Started, Get Involved, and Blog. Below this is a large banner titled "ROS in Education" with a photo of a child interacting with a robot. To the right of the banner is a "Read More" button. Below the banner, there are two main sections: "ROS Foxy Fitzroy" and "ROS Noetic Ninjemys". The "ROS Noetic Ninjemys" section is highlighted with a red arrow pointing to its "Download" button. To the right of these sections are links to "Wiki", "ROS Answers", "Blog", and "Forums". At the bottom, there's a footer with "Press Kit", "Contact Us", a Google+ icon, and a Creative Commons license notice.

ROS

About Why ROS? Getting Started Get Involved Blog

ROS in Education

ROS is used by students of all ages, from kids interacting with robots in museum exhibits to graduate students learning about the latest solutions to common robotics problems. Because it supports such a wide variety of robots, including low cost platforms like the TurtleBot and LEGO Mindstorms, ROS is especially well-suited to classroom use.

Read More

ROS Foxy Fitzroy

Foxy Fitzroy is the latest ROS 2 LTS release. It's supported on Ubuntu Focal, macOS and Windows 10. Get Foxy Fitzroy now!

Download

ROS Noetic Ninjemys

ROS Noetic Ninjemys is latest ROS 1 LTS Release targeted at the Ubuntu 20.04 (Focal) release, though other systems are supported to varying degrees.

noetic \ Installation

### ROS Noetic installation instructions

These instructions will install **ROS Noetic Ninjemys**, which is available for Ubuntu Focal (20.04), Debian Buster (10), and [other platform options](#).

To install our previous long-term support release, **ROS Melodic Morenia**, please see the [ROS Melodic installation instructions](#).

### Select Your Platform

Supported:

- Ubuntu Focal amd64 armhf arm64
- Debian Buster amd64 arm64**

Source installation

Experimental:

- Windows 10 amd64
- Arch Linux Any amd64 i686 arm armv6h armv7h aarch64

Except where otherwise noted, the ROS wiki is licensed under the [Creative Commons Attribution 3.0](#) license. © 2016-2020 ROS Wiki. noetic/installation

الان افتح لوحة الأوامر في نظام اوبنتو بالضغط على "ctrl+alt+t"

Terminal window showing the command prompt:

```
mallikarjun@mallikarjun: ~$
```

The terminal window is open over a web browser displaying the ROS Noetic installation instructions. The browser window shows the "1.4 Installation" section, which includes the instruction: "First, make sure your Debian package index is up-to-date:" followed by the command:

```
sudo apt update
```

The terminal window is currently empty, ready for the user to enter the command.

“enter” بعدها انسخ النصوص المحدد عليها في الصور في لوحة أوامر اوبنتو بالترتيب واضغط

-1

1. Installation

1.1 Configure your Debian repositories

Configure your Debian repositories to allow "contrib" and "non-free". You can [follow the Debian guide](#) for instructions on doing this.

1.2 Setup your sources.list

Setup your computer to accept software from packages.ros.org. ROS Noetic **ONLY** supports Buster (Debian 10).

```
sudo sh -c 'echo "deb http://packages.ros.org/ubuntu-binary/main" > /etc/apt/sources.list.d/ros-latest.list'
```

**Warning** Source Debs are also available

1.3 Set up your keys

```
sudo apt-key adv --keyserver hkp://ha.pool.sks-keyservers.net:80 --recv-key C1CF6E31E68AE966663172B4F42ED478A817CE54
```

1.4 Installation

First, make sure your Debian package index is up-to-date:

```
sudo apt update
```

Now pick how much of ROS you would like to install.

-2

1. Installation

1.1 Configure your Debian repositories

Configure your Debian repositories to allow "contrib" and "non-free". You can [follow the Debian guide](#) for instructions on doing this.

1.2 Setup your sources.list

Setup your computer to accept software from packages.ros.org. ROS Noetic **ONLY** supports Buster (Debian 10).

```
sudo sh -c 'echo "deb http://packages.ros.org/ubuntu-binary/main" > /etc/apt/sources.list.d/ros-latest.list'
```

**Warning** Source Debs are also available

1.3 Set up your keys

```
sudo apt-key adv --keyserver hkp://ha.pool.sks-keyservers.net:80 --recv-key C1CF6E31E68AE966663172B4F42ED478A817CE54
```

1.4 Installation

First, make sure your Debian package index is up-to-date:

```
sudo apt update
```

Now pick how much of ROS you would like to install.

**Desktop-Full Install: (Recommended)** Everything in **Desktop** plus 2D/3D simulators and 2D/3D perception packages

```
sudo apt install ros-noetic-desktop-full
```

or click [here](#)

**Desktop Install:** Everything in **ROS-Base** plus tools like `rqt` and `rviz`

```
sudo apt install ros-noetic-desktop
```

## 1. Installation

### 1.1 Configure your Debian repositories

Configure your Debian repositories to allow "contrib" and "non-free". You can [follow the Debian guide](#) for instructions on doing this.

### 1.2 Setup your sources.list

Setup your computer to accept software from packages.ros.org. ROS Noetic **ONLY** supports Buster (Debian 10).

```
sudo sh -c "echo 'deb http://packages.ros.org/ros/ubuntu $(lsb_release -sc) main' > /etc/apt/sources.list.d/ros-latest.list"
```

**Warning:** Source Debs are also available

### 1.3 Set up your keys

```
sudo apt-key adv --keyserver hkp://ha.pool.sks-keyservers.net:80 --recv-key C1CF6E31E6BADE8869B172B4F42ED0FBAB17C654
```

### 1.4 Installation

First, make sure your Debian package index is up-to-date:

```
sudo apt update
```

Now pick how much of ROS you would like to install.

**Desktop-Full Install: (Recommended):** Everything in **Desktop** plus 2D/3D simulators and 2D/3D perception packages

```
sudo apt install ros-noetic-desktop-full
```

or [click here](#)

**Desktop Install:** Everything in **ROS-Base** plus tools like [rqt](#) and [rviz](#)

```
sudo apt install ros-noetic-desktop
```

or [click here](#)

## 1.1 Configure your Debian repositories

Configure your Debian repositories to allow "contrib" and "non-free". You can [follow the Debian guide](#) for instructions on doing this.

## 1.2 Setup your sources.list

Setup your computer to accept software from packages.ros.org. ROS Noetic **ONLY** supports Buster (Debian 10).

```
sudo sh -c "echo 'deb http://packages.ros.org/ros/ubuntu $(lsb_release -sc) main' > /etc/apt/sources.list.d/ros-latest.list"
```

**Warning:** Source Debs are also available

## 1.3 Set up your keys

```
sudo apt-key adv --keyserver hkp://ha.pool.sks-keyservers.net:80 --recv-key C1CF6E31E6BADE8869B172B4F42ED0FBAB17C654
```

## 1.4 Installation

First, make sure your Debian package index is up-to-date:

```
sudo apt update
```

Now pick how much of ROS you would like to install.

**Desktop-Full Install: (Recommended):** Everything in **Desktop** plus 2D/3D simulators and 2D/3D perception packages

```
sudo apt install ros-noetic-desktop-full
```

or [click here](#)

**Desktop Install:** Everything in **ROS-Base** plus tools like [rqt](#) and [rviz](#)

```
sudo apt install ros-noetic-desktop
```

or [click here](#)

**ROS-Base: (Bare Bones)** ROS packaging, build, and communication libraries. No GUI tools.

```
sudo apt install ros-noetic-ros-base
```

or [click here](#)

There are even more packages available in ROS. You can always install a specific package directly.

```
sudo apt install ros-noetic-PACKAGE
```

e.g.

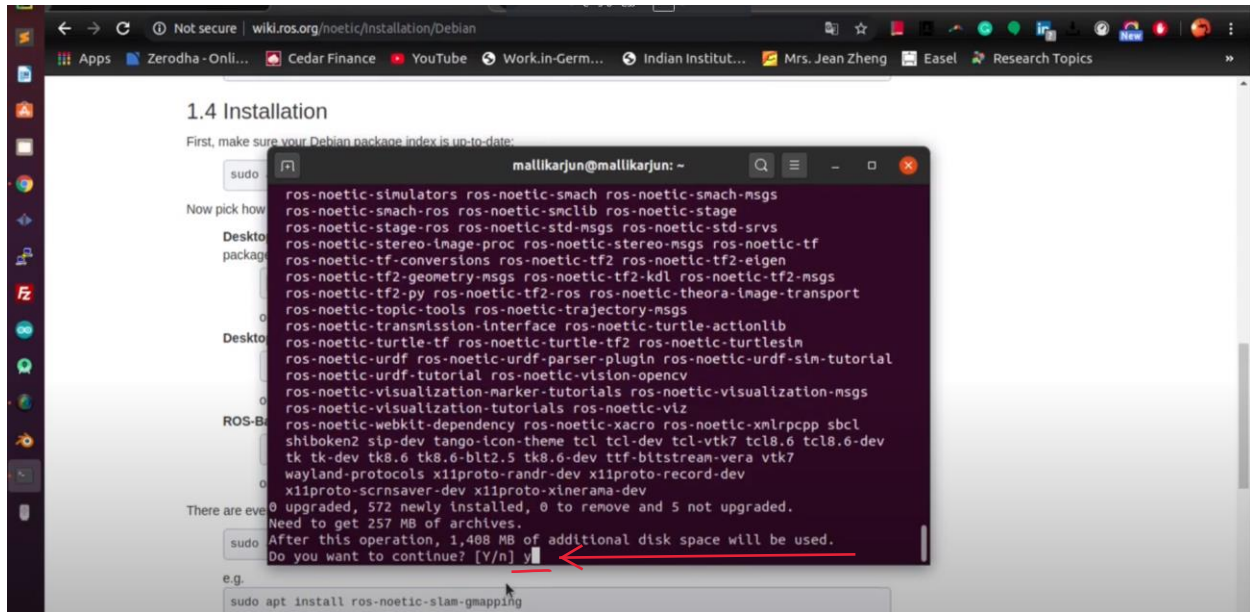

```
sudo apt install ros-noetic-slam-gmapping
```

wiki.ros.org/noetic/Installation/Debian | عربي

```
sudo apt install ros-noetic-desktop
```

or click here

**ROS-Base: (Bare Bones)** ROS packaging, build, and communication libraries. No GUI tools.

```
sudo apt install ros-noetic-ros-base
```

or click here

There are even more packages available in ROS. You can always install a specific package directly.

```
sudo apt install ros-noetic-PACKAGE
```

e.g.

```
sudo apt install ros-noetic-slam-mapping
```

To find available packages, see [ROS Index](#) or use:

```
apt search ros-noetic
```

### 1.5 Environment setup

You must source this script in every **bash** terminal you use ROS in.

```
source /opt/ros/noetic/setup.bash
```

It can be convenient to automatically source this script every time a new shell is launched. These commands will do that for you.

**Bash**

 If you have more than one ROS distribution installed, `~/.bashrc` must only source the `setup.bash` for the version you are currently using.

```
echo "source /opt/ros/noetic/setup.bash" >> ~/.bashrc
source ~/.bashrc
```

**zsh**

```
echo "source /opt/ros/noetic/setup.zsh" >> ~/.zshrc
source ~/.zshrc
```

### 2. Tutorials

Now, to test your installation, please proceed to the [ROS Tutorials](#).

## 7.1-

The screenshot shows the ROS Noetic installation page. A red arrow points to the terminal command for sourcing the setup script in zsh:

```
echo "source /opt/ros/noetic/setup.zsh" >> ~/.zshrc
source ~/.zshrc
```

The page content includes instructions for installing ROS packages and setting up the environment.

`sudo apt install ros-noetic-desktop`

or [click here](#)

**ROS-Base: (Bare Bones)** ROS packaging, build, and communication libraries. No GUI tools.

`sudo apt install ros-noetic-ros-base`

or [click here](#)

There are even more packages available in ROS. You can always install a specific package directly.

`sudo apt install ros-noetic-PACKAGE`

e.g.

`sudo apt install ros-noetic-slam-mapping`

To find available packages, see [ROS Index](#) or use:

`apt search ros-noetic`

### 1.5 Environment setup

You must source this script in every **bash** terminal you use ROS in.

```
source /opt/ros/noetic/setup.bash
```

It can be convenient to automatically source this script every time a new shell is launched. These commands will do that for you.

**Bash**

If you have more than one ROS distribution installed, `~/.bashrc` must only source the `setup.bash` for the version you are currently using.

```
echo "source /opt/ros/noetic/setup.bash" >> ~/.bashrc
source ~/.bashrc
```

**zsh**

```
echo "source /opt/ros/noetic/setup.zsh" >> ~/.zshrc
source ~/.zshrc
```

### 2. Tutorials

Now, to test your installation, please proceed to the [ROS Tutorials](#).

Except where otherwise noted, the ROS wiki is licensed under the [Creative Commons Attribution 3.0](#) (Shanel.oretz.ami 16:49 15 23-05-2020) Wiki: noetic/Installation/Debian

## 7.2-

The screenshot shows the ROS Noetic installation page. A red arrow points to the terminal command for sourcing the setup script in zsh:

```
echo "source /opt/ros/noetic/setup.zsh" >> ~/.zshrc
source ~/.zshrc
```

The page content includes instructions for installing ROS packages and setting up the environment.

`sudo apt install ros-noetic-desktop`

or [click here](#)

**ROS-Base: (Bare Bones)** ROS packaging, build, and communication libraries. No GUI tools.

`sudo apt install ros-noetic-ros-base`

or [click here](#)

There are even more packages available in ROS. You can always install a specific package directly.

`sudo apt install ros-noetic-PACKAGE`

e.g.

`sudo apt install ros-noetic-slam-mapping`

To find available packages, see [ROS Index](#) or use:

`apt search ros-noetic`

### 1.5 Environment setup

You must source this script in every **bash** terminal you use ROS in.

```
source /opt/ros/noetic/setup.bash
```

It can be convenient to automatically source this script every time a new shell is launched. These commands will do that for you.

**Bash**
